Dear friends,

We would like to warmly invite you to participate to the virtual conference: **“Apitherapy for children”**. Nowadays people are increasingly turning to nature for help with their health. By consuming bee products, we strengthen our health and relieve many symptoms of many diseases, and apitherapy is just that, consuming bee products to improve and strengthen our health. For many years, our grandmothers believed that local bee products are a real nature’s treasure for our health. Children are our greatest wealth, and we dedicate this virtual conference Apitherapy for Children “Bees, Children and Health” to them. Through the international conference we want to show how important Apitherapy for children really is, especially in respect to living a healthy lifestyle, regular consumption of locally produced food with the emphasis on bee products for preventive purposes as well as the use of different bee products to relieve various diseases.

In Slovenia we have a saying: **“Kar se Janezek nauči, to Janez zna”**, meaning what a little child learns that is what an adult knows. Having that in mind we must at least try to encourage our children to use bee products regularly to a point where it becomes a part of their routine, daily diet. That will affect them as adults. We have to offer our children the best that nature has to offer. Giving them bee products and apitherapy preparations that are locally made is the best and the right choice.

Boštjan Noč, president of the conference

Main topics

Apitherapy for children Virtual Conference main Topics:

-  **Medicinal bee plants useful for bees and children**
-  **Medicinal beekeeping, rules, and principles**
-  **Bio-pharmacology and quality of beehive products**
-  **Prevention and treatment of children diseases (allergies included) with beehive products**
-  **Api-Tourism and Api-Education for Children**
-  **Prevention and treatment of viral diseases in children**

Abstract submission

Deadline for abstract submission is 31. May 2021

Abstracts can be submitted through Symposium website:

<https://www.czs.si/content/xApitherapy>, Abstract submission, where you can also find the instruction.

Registration

The Apitherapy for children Virtual conference 2021 is free of fees.

Exhibition

A commercial on-line exhibition will be staged concurrently with the Virtual conference programme to include Apitherapy for children's medical products, instruments and equipment.

Type of registration	Standard fee
Api-expo pdf presentation	150 €
Api-expo pdf and video presentation	180 €
Api-expo pdf, video and online zoom presentation	200 €

Contests

Photo contests will be organised for the categories of "honeybees and medicinal honey plants" and "honeybees and children".

Join us at an event filled with lectures and round tables, complete with a photo contest, with information that will be useful for beekeepers, medical doctors, scientists, and parents.

Working with children is one of the activities with the highest level of responsibility, because by caring for children we care for the future of humanity.

Using bee products prevents children from various diseases and makes them grow strong and healthy.

Friday, 22 October (CET, Ljubljana, Bratislava, Belgrade)
